

As an IT admin, how do you Future- Proof your AI agents?

We want to learn from you!

Our design and research team want to learn as much as you can to inform how we make our products truly a world class experience

INSTRUCTIONS

How to use the sticky notes

1. Tell us about yourself - job role, industry
2. Above each design principle, add stickies to respond to the questions!
3. Does the AI design principles resonate with how your company is designing AI experiences?

Name & Role: Company / Industry: Today I am feeling...	Name & Role: Company / Industry: Today I am feeling...	Name & Role: Company / Industry: Today I am feeling...
We build in proper governance in our AI tools by...	Top task I would like AI to do on my behalf would be...	We leverage AI in our work processes by...
We make sure our systems are secure by...	AI helps us protect our data by...	What would help our teams scale more is by using AI to...

Simplicity

Context-aware

Intelligence

Security

What is your preferred way for managing multiple (say 3-5) AI agents/tools/solutions?

I would like to keep track of multiple AI agents being used in our company by...

What I need to know as an IT admin before making AI tools/solutions available to my organization to maintain a sense of control and/or visibility is...

Some risks I see in my work are...

What are some things that AI tools/solutions can help you, the IT admin, to govern more effectively?

I keep my organization safe by...

When setting up security guard-rails for launching AI tools/solutions, what is most important to you?

What data can/can't be used...

Simple by Default,

01

Power on Demand

Copilot Studio

It should just work! Common tasks are easy-and complex options are available when they're needed.

Learn Once,

02

Use Everywhere

Copilot Studio

Flatten the learning curve. Build customer confidence with familiar patterns. Don't make them think!

Thoughtfully Intelligent

03

Use AI to build AI. Give the customer the right thing at the right moment. Make the future now.

Copilot Studio

Trustworthy and Reliable

04

Build systems that get it right-and when we don't, we own it and fix it. Trust is earned.

Copilot Studio
